SUMMARY

Python backend and AI developer with hands-on experience building and deploying LLM-powered production systems across healthcare, fintech, and education. Proficient in Flask, FastAPI, NLP pipelines, REST APIs, and cloud platforms (AWS, Render). Delivered 3 live projects integrating Groq LLM, TF-IDF, and PostgreSQL — each solving real-world problems with measurable outcomes.

SKILLS

Programming Languages	Python, SQL, C++
AI / ML	LLM Integration, NLP, TF-IDF, Scikit-Learn, NumPy, Pandas
Cloud / Tools	AWS, Render, Git, GitHub, VS Code
Backend	Flask, FastAPI, REST APIs, JSON Handling
Databases	SQLite, PostgreSQL
Academic Coursework	DSA, OOP, DBMS, Computer Networks, Operating Systems

PROJECTS

ASHLYSIS — AI Exam Intelligence Platform ([Github](#) – [Live Demo](#))

Mar 2026 – May 2026

Python • Flask • Groq API • TF-IDF • PyMuPDF • Render

- Built NLP pipeline using TF-IDF and semantic similarity achieving ~95% topic-detection accuracy across 2–6 uploaded exam PDFs.
- Integrated Groq LLM to automate question analysis and generate personalised study plans from uploaded documents in under 5s.
- Designed Flask backend with PyMuPDF OCR workflows for structured extraction from multi-page academic PDFs.

SentiFi — AI Market Sentiment Analyzer ([Github](#) – [Live Demo](#))

Jan 2026 – Mar 2026

Python • FastAPI • NLP • PostgreSQL • Render

- Aggregates financial news generating BUY/HOLD/SELL signals across 500+ equity tickers with sub-5s API response time.
- Designed batch NLP scoring pipeline processing 500+ articles/day; PostgreSQL-backed REST API enables historical signal replay.
- Built interactive dashboard visualising sentiment trends and confidence scores for actionable market insights.

Dadi Ki Dawai — AI Healthcare Assistant ([Github](#) – [Live Demo](#))

Oct 2025 – Dec 2025

Python • Flask • Groq LLM • REST API • JavaScript • PWA • Render

- LLM-powered assistant (Groq) handling 20+ symptom categories with context-aware multi-turn conversations under 3s response time.
- Secure REST APIs for health report generation, conversation history, and session management with structured data storage.
- Deployed as a PWA with responsive mobile/desktop layout and offline fallback — no app-store installation required.

EDUCATION

B.E. in Computer Engineering, SSJCET, Mumbai University

2023 – 2027
